Monitor Time
Message from Monitor Mentor Norm

Monitors are needed. It is the responsibility of every MacsWest Club Member to volunteer in Computers West Room four hours per year. Yup! That's all! Just four hours. The length of an average football game (plus the post-game wrap-u to Wickenburg, have breakfast, do a little shopping, and drive back to Sun City West. In other words, not much time at a

What is required of monitors?

Smile! Always! Even from behind a mask!

When a new member joins the Club, Membership Envelopes MUST have all the information completed or the new Legibility is a huge necessity here. Would your fifth-grade teacher be able to read it?

As always, remember to bring something to do. It's a great time to do catch up on your reading. Got a laptop or tablet

Easiest way to sign up to Monitor is to click **HERE**

Monitor coordinator Norm says, "Please do not hesitate to email me (macscwgb375@gmail.com) with any questions, co
Thanks to all those that stepped up to help!

Tip of the Week

## How to Completely Turn Off Live Photo on iPhone Came
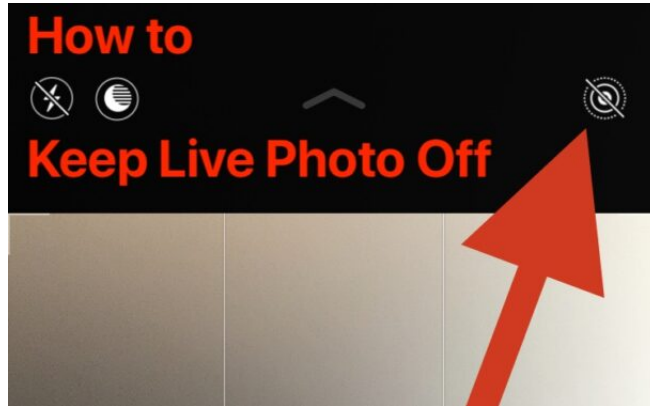

How to Preserve the Live Photo Settings on iPhone Camera to Keep it Off

How to Preserve the Live Photo Settings on iPhone Camera to Keep it Off

Want the iPhone camera to maintain whatever your Live Photo setting choice is? Here's where you can enable that option:

1. Open the "Settings" app on iPhone (or iPad)
2. Go to "Camera"
3. Choose "Preserve Settings"
4. Toggle the switch for "Live Photos" to the ON position – this allows the iPhone to preserve the Live Photo setting to off or on, rather than reset it to always be on every time the Camera app is open
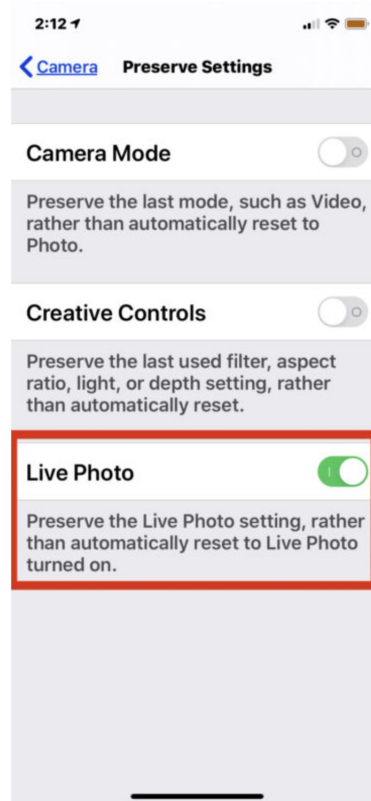

5. Close out of Settings and return to the Camera app, toggling Live Photo to be off by tapping the button within camera as usual to the off position

What you need to know about JPEG, HEIF, HEIC, and ProRAW

Your iPhone, iPad, and Mac natively support a variety of image formats. With JPEG, HEIF, and ProRAW being what they mean and how to pick between them.

How to switch between formats

By default, your Apple device will capture in the HEIF format. To use JPEG or to enable ProRAW mode, you will need to adjust the camera settings.

ProRAW is only available on iPhone 12 Pro and later devices.

How to enable JPEG and ProRAW modes for the camera

- Launch **Settings**,
- Tap **Camera**,
- Tap **Formats**,
- To turn on JPEG, tap **Most Compatible** under Camera Capture. To revert to HEIF, tap **High Efficiency**,
- To enable the ProRAW toggle, which can be enabled at-will inside the Camera app, turn on **Apple ProRAW**,

The new image format will apply immediately to any new photo taken with the built-in cameras.
