

Using Mind Maps for Planning Your Life

Jim Eagar

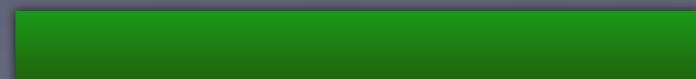

Who are You?

When we were kids we were taught to Outline our thoughts

Outlines are Linear

Brains are Non-Linear

Why a Mind Map?

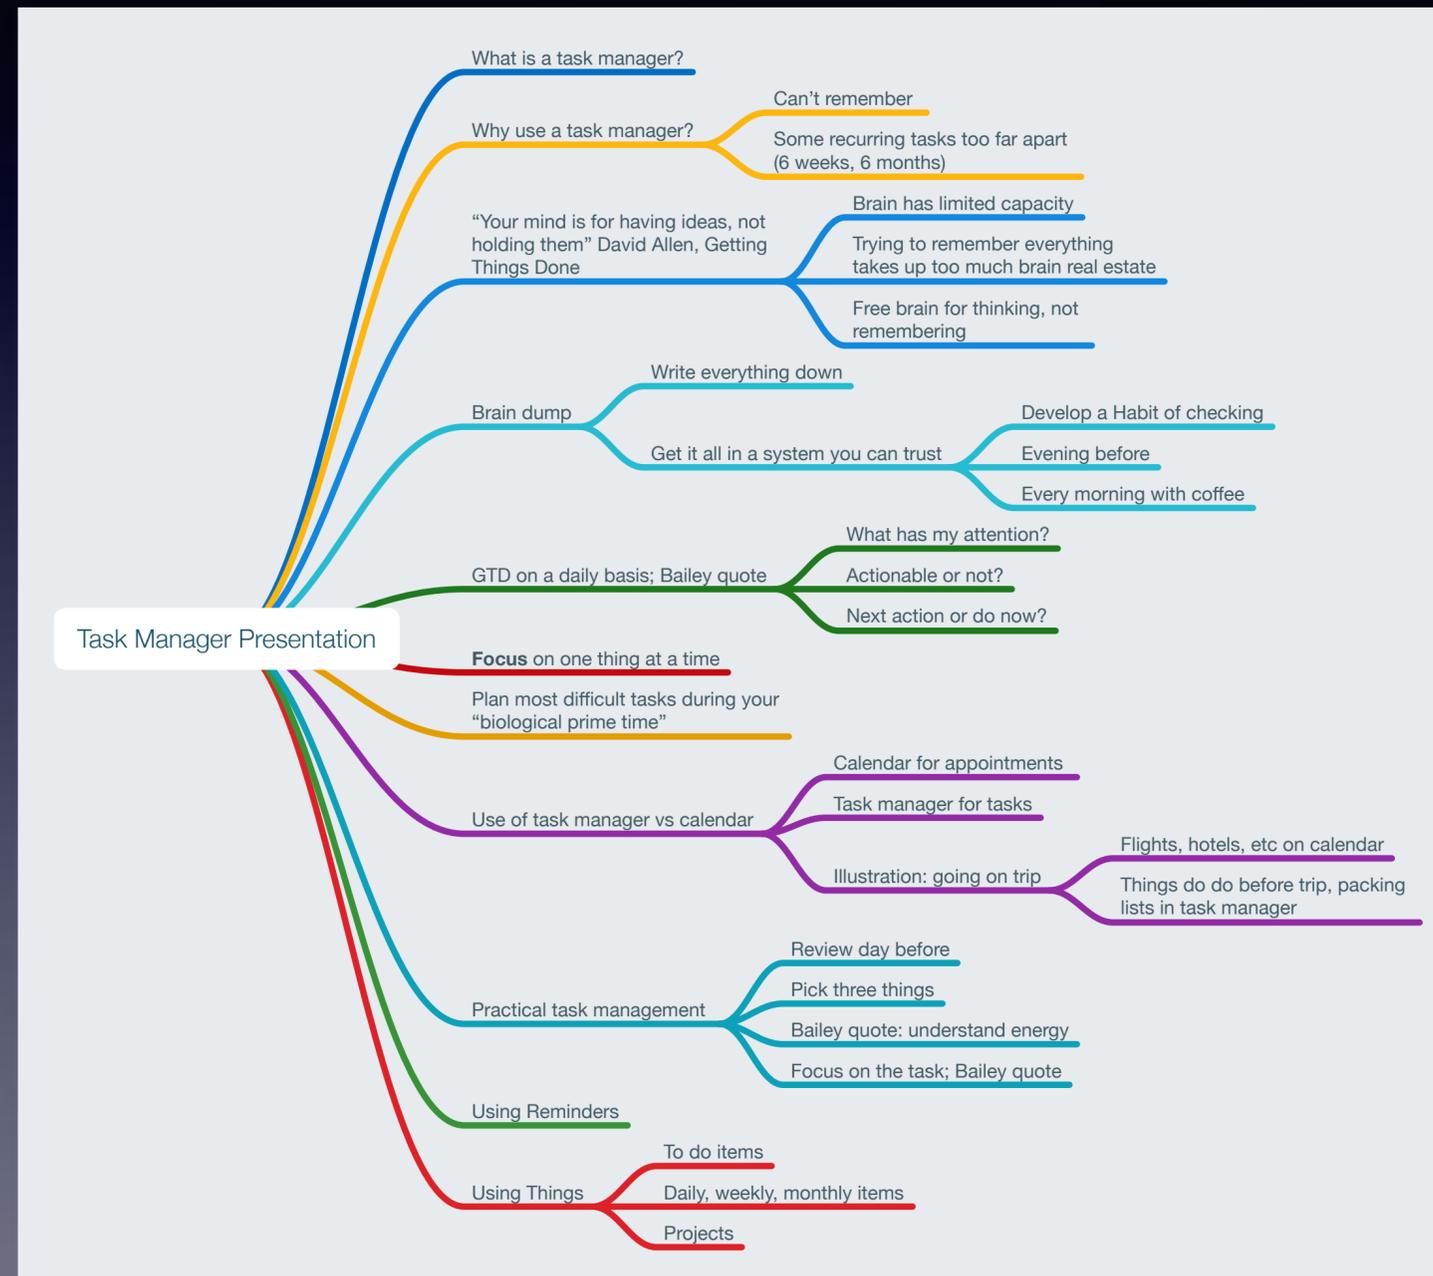

- **More flexible, easy reorganization**
- **Graphical way of recording thinking**
- **Helps to see relationships**

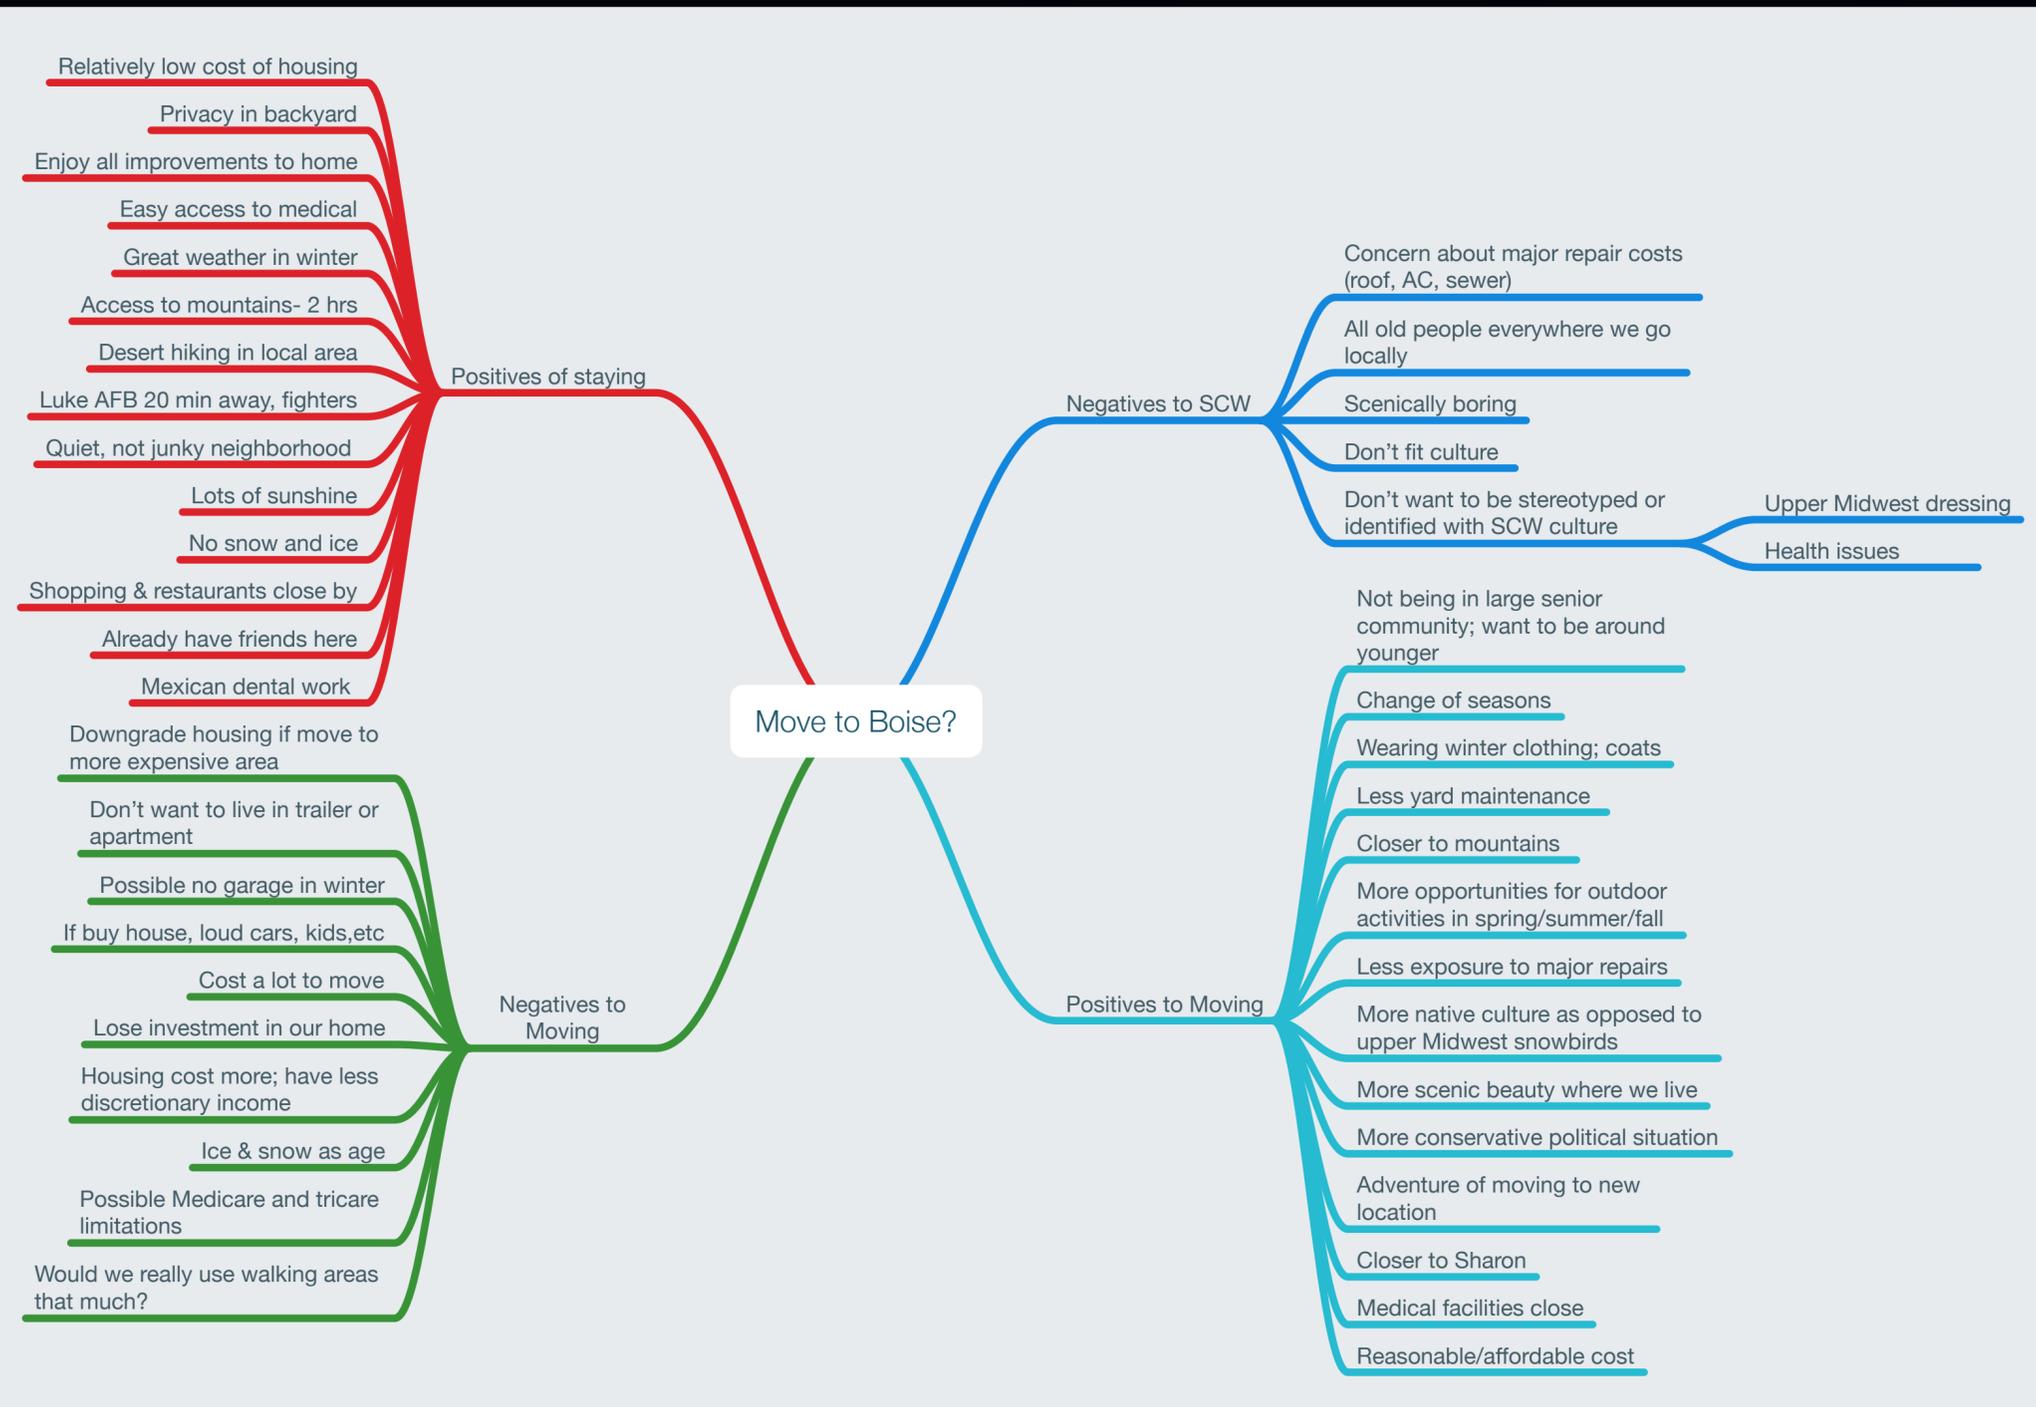

What Can I Use a Mind Map For?

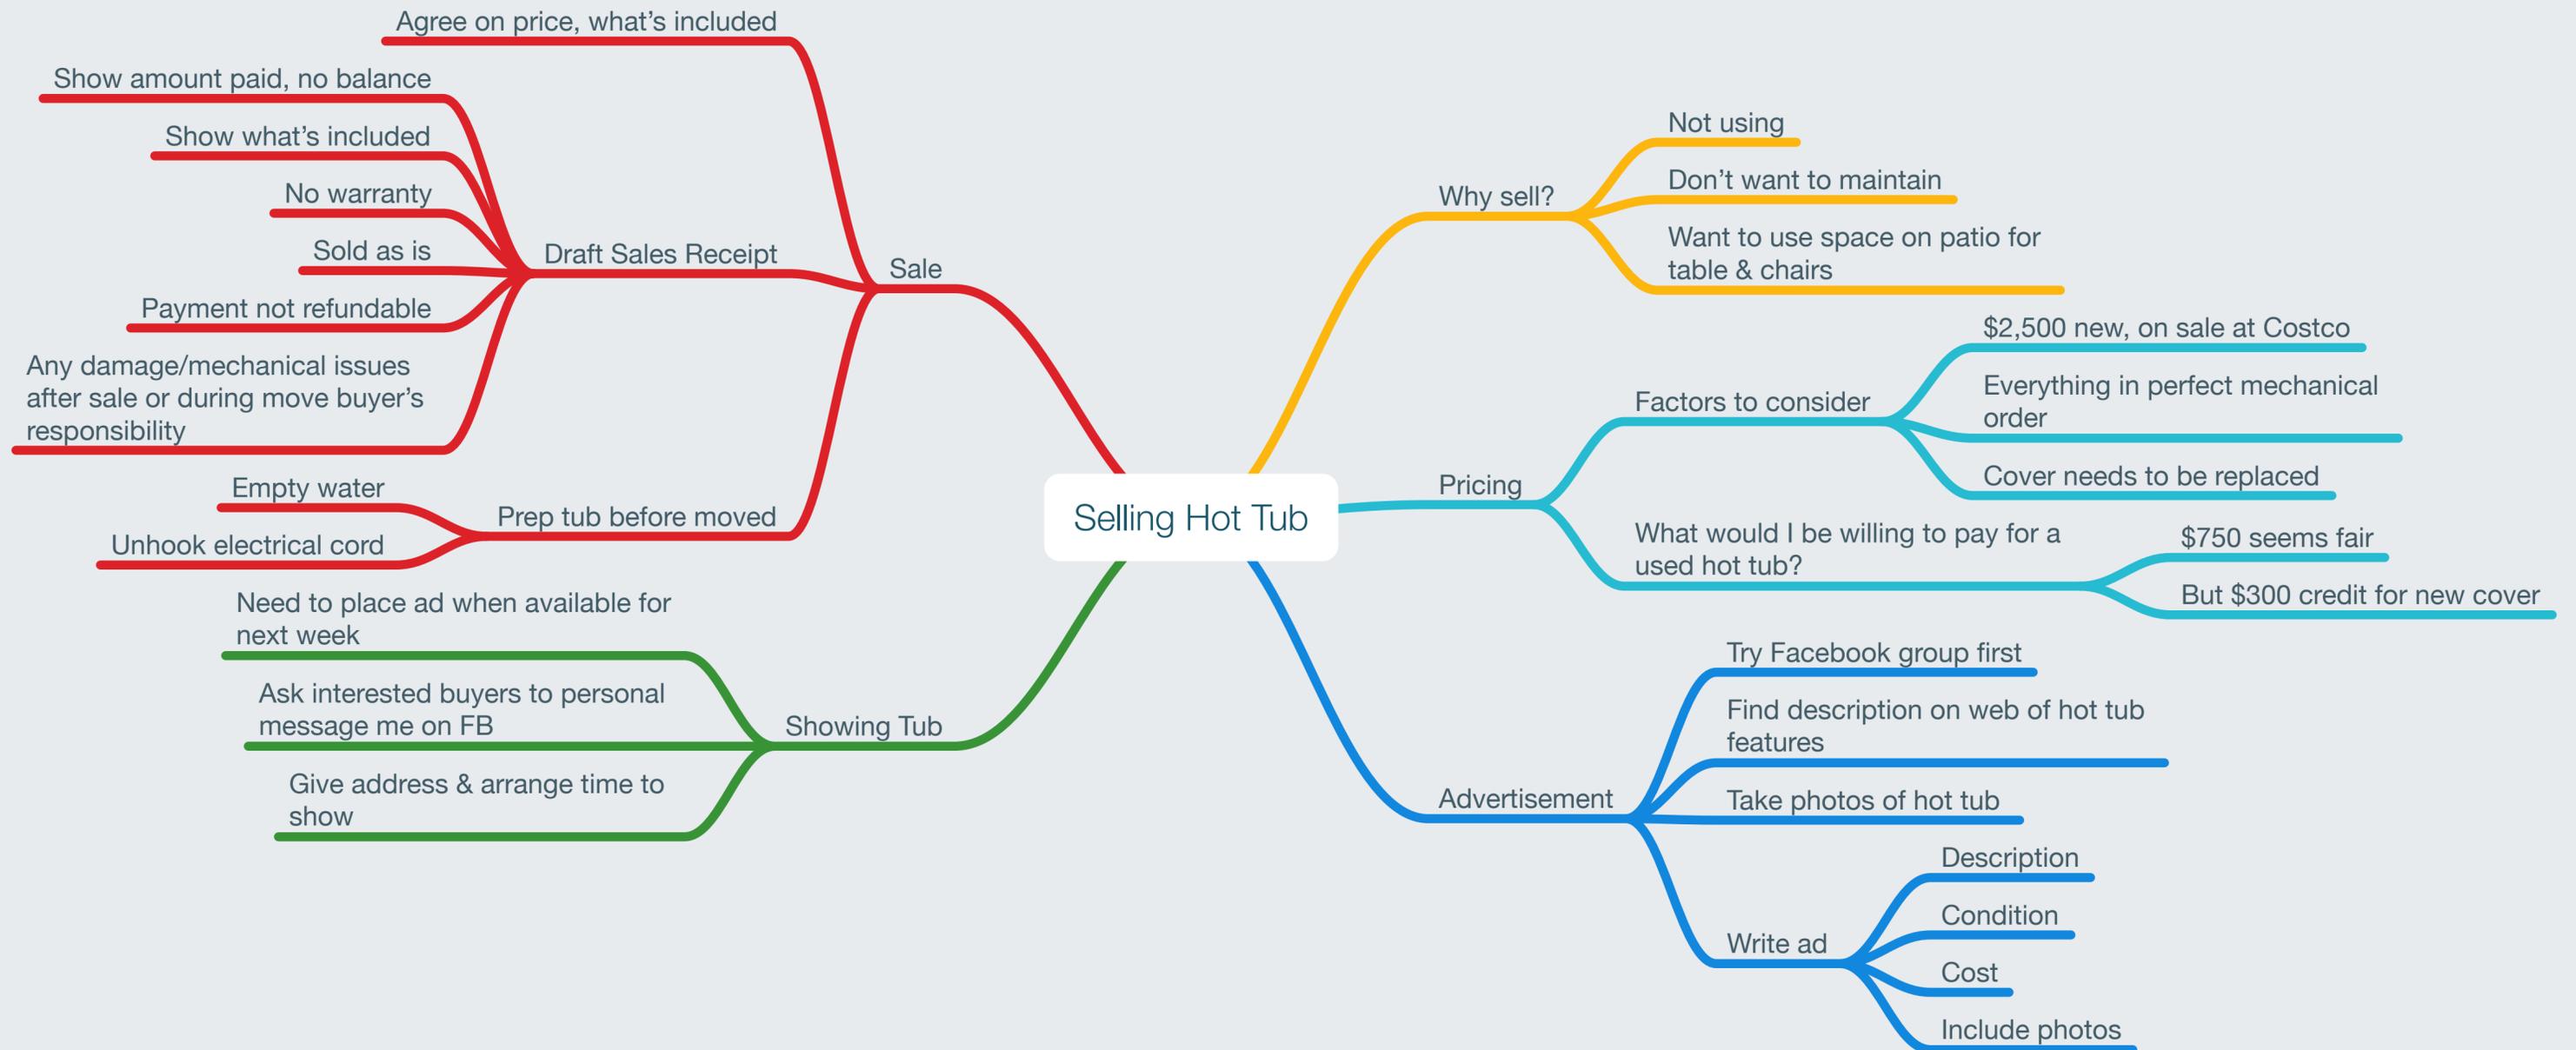

Planning a Presentation

Making a Big Decision

Planning a Project

How Elders can be Great Kissers

November 14, 2021

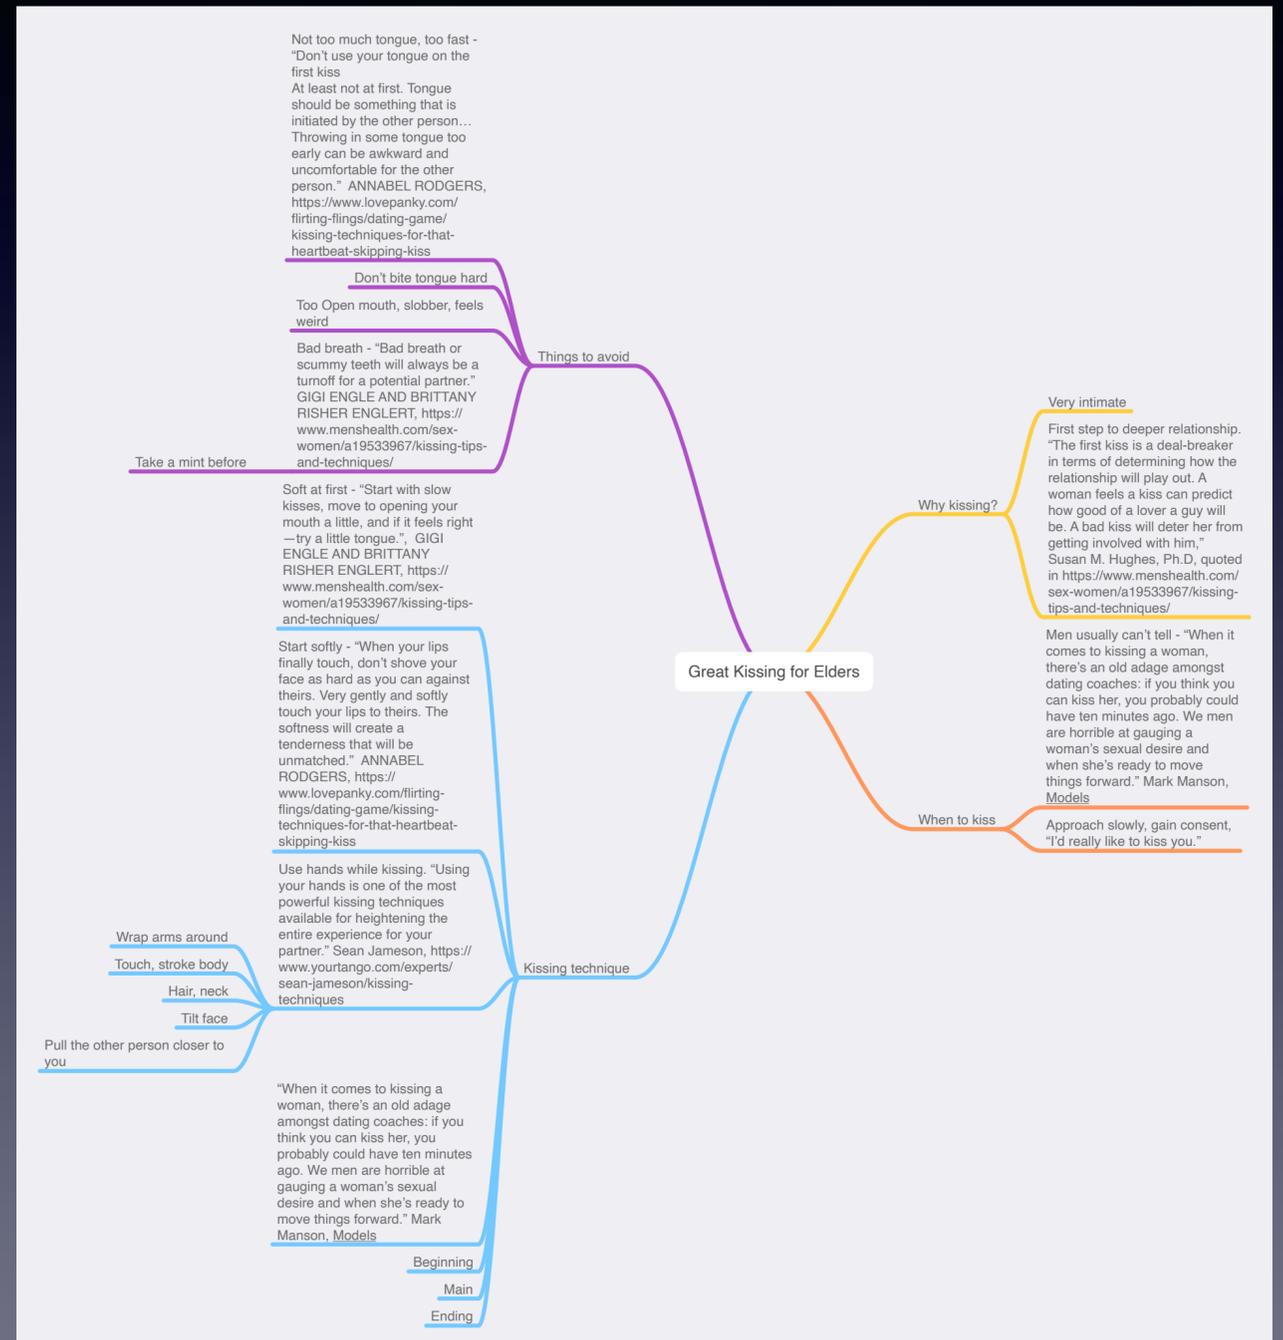

Kissing is Important!

Kissing is typically the first step to a deeper sexual relationship with another person. Susan Hughes was quoted in an article in *Men's Health*, as saying, "The first kiss is a deal-breaker in terms of determining how the relationship will play out. A woman feels a kiss can predict how good of a lover a guy will be. A bad kiss will deter her from getting involved with him."

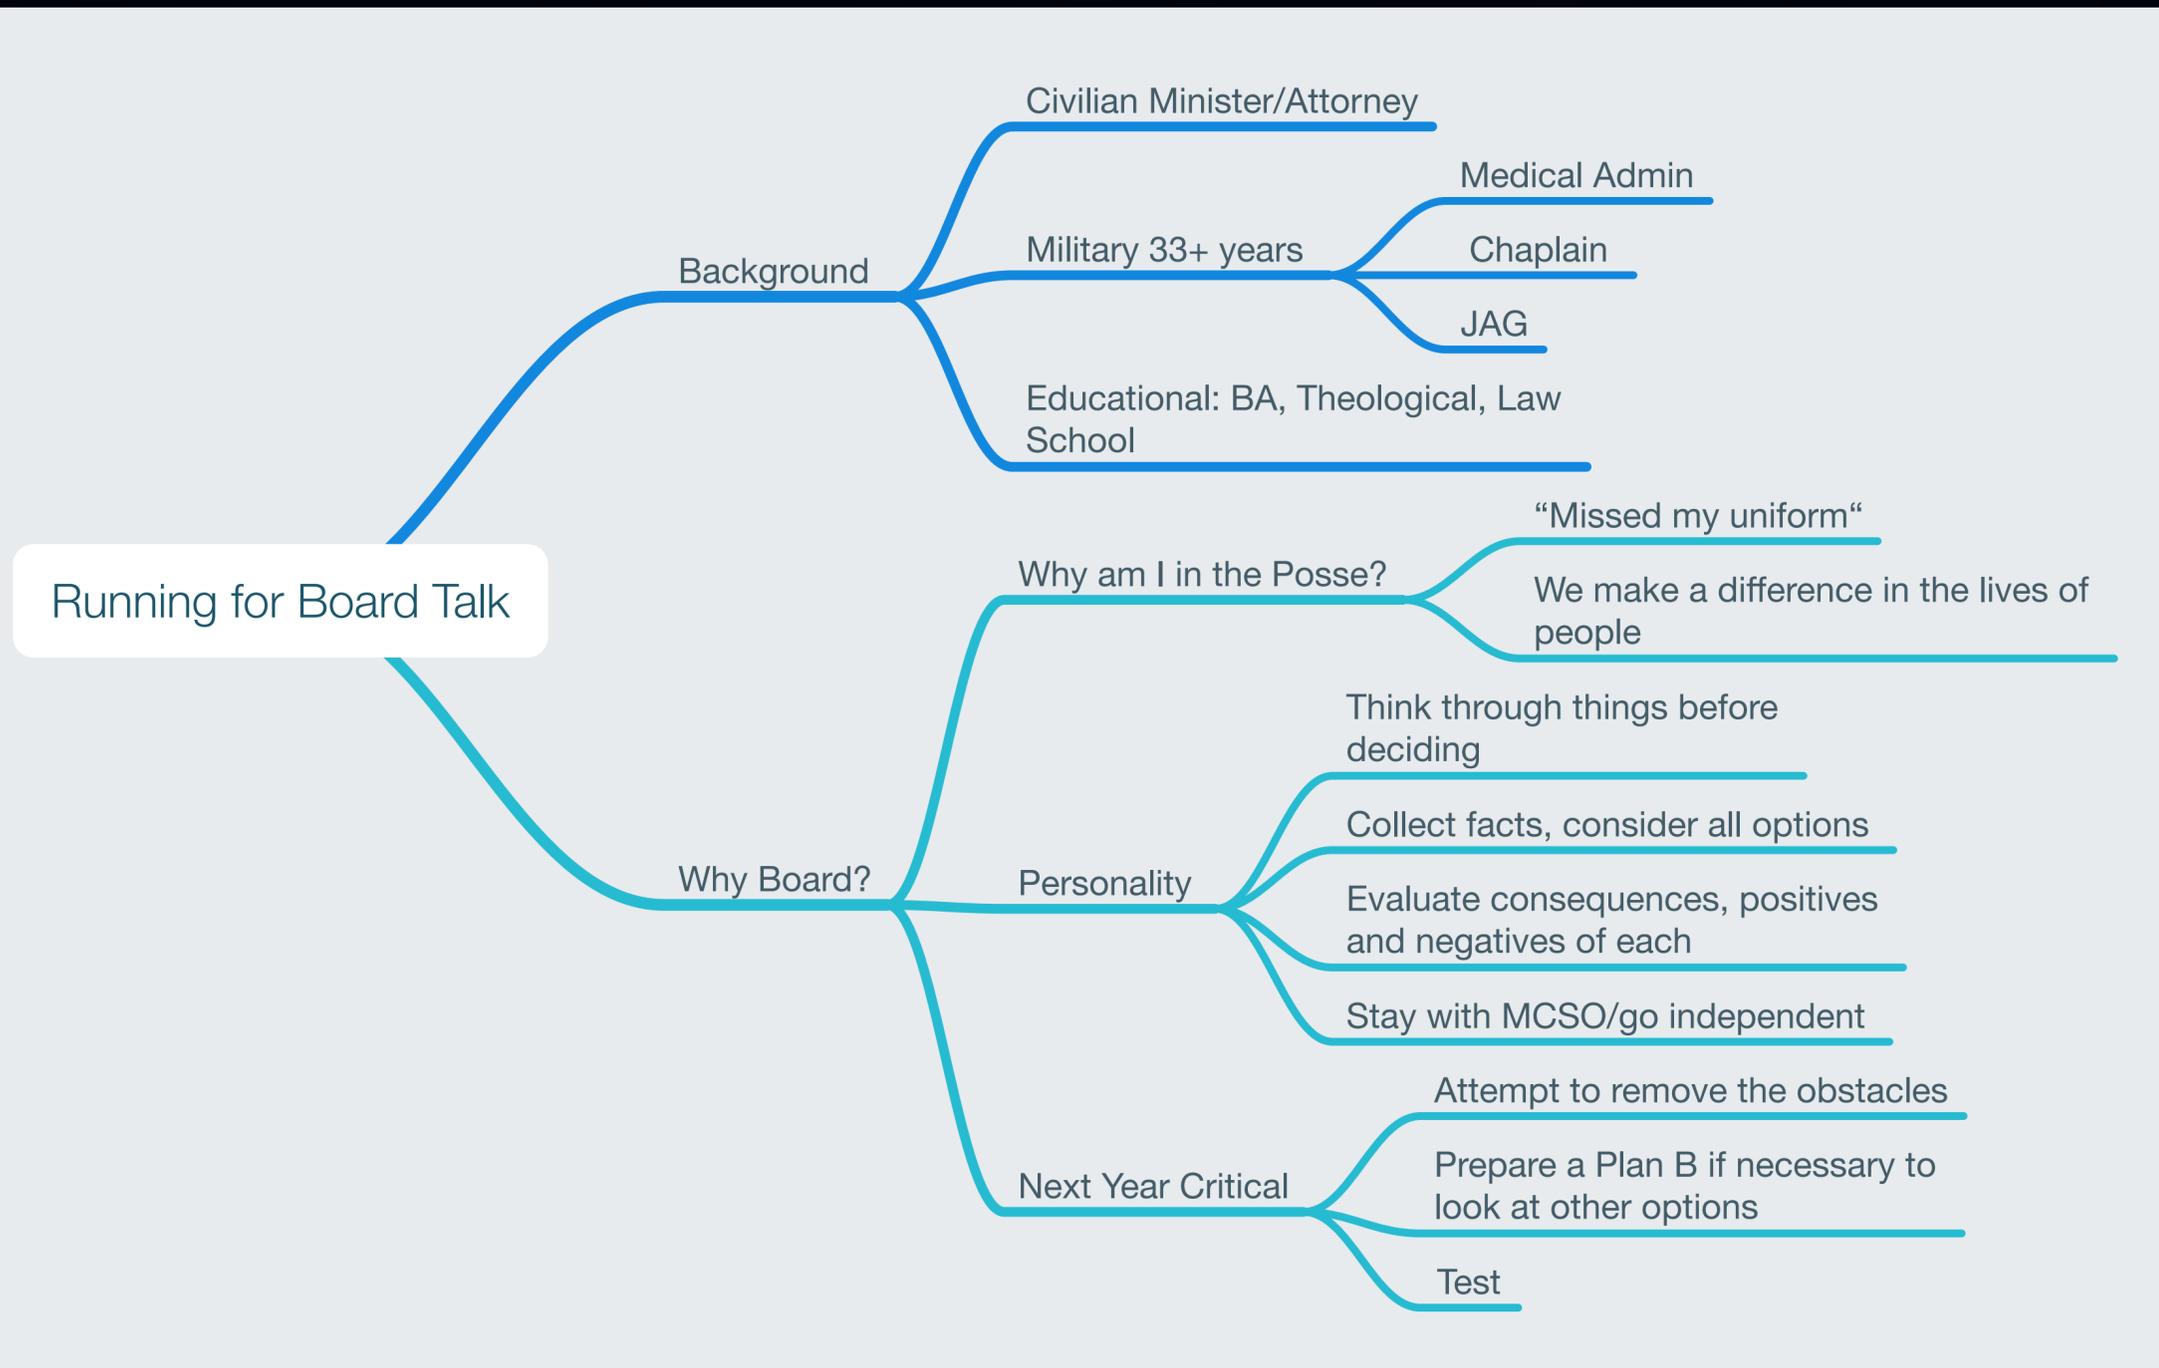

My wife, Lanette, has some thoughts about kissing as well. "Kissing is so important. It can make you comfortable or uncomfortable. Or it can be the first step to the next step."

When to Kiss

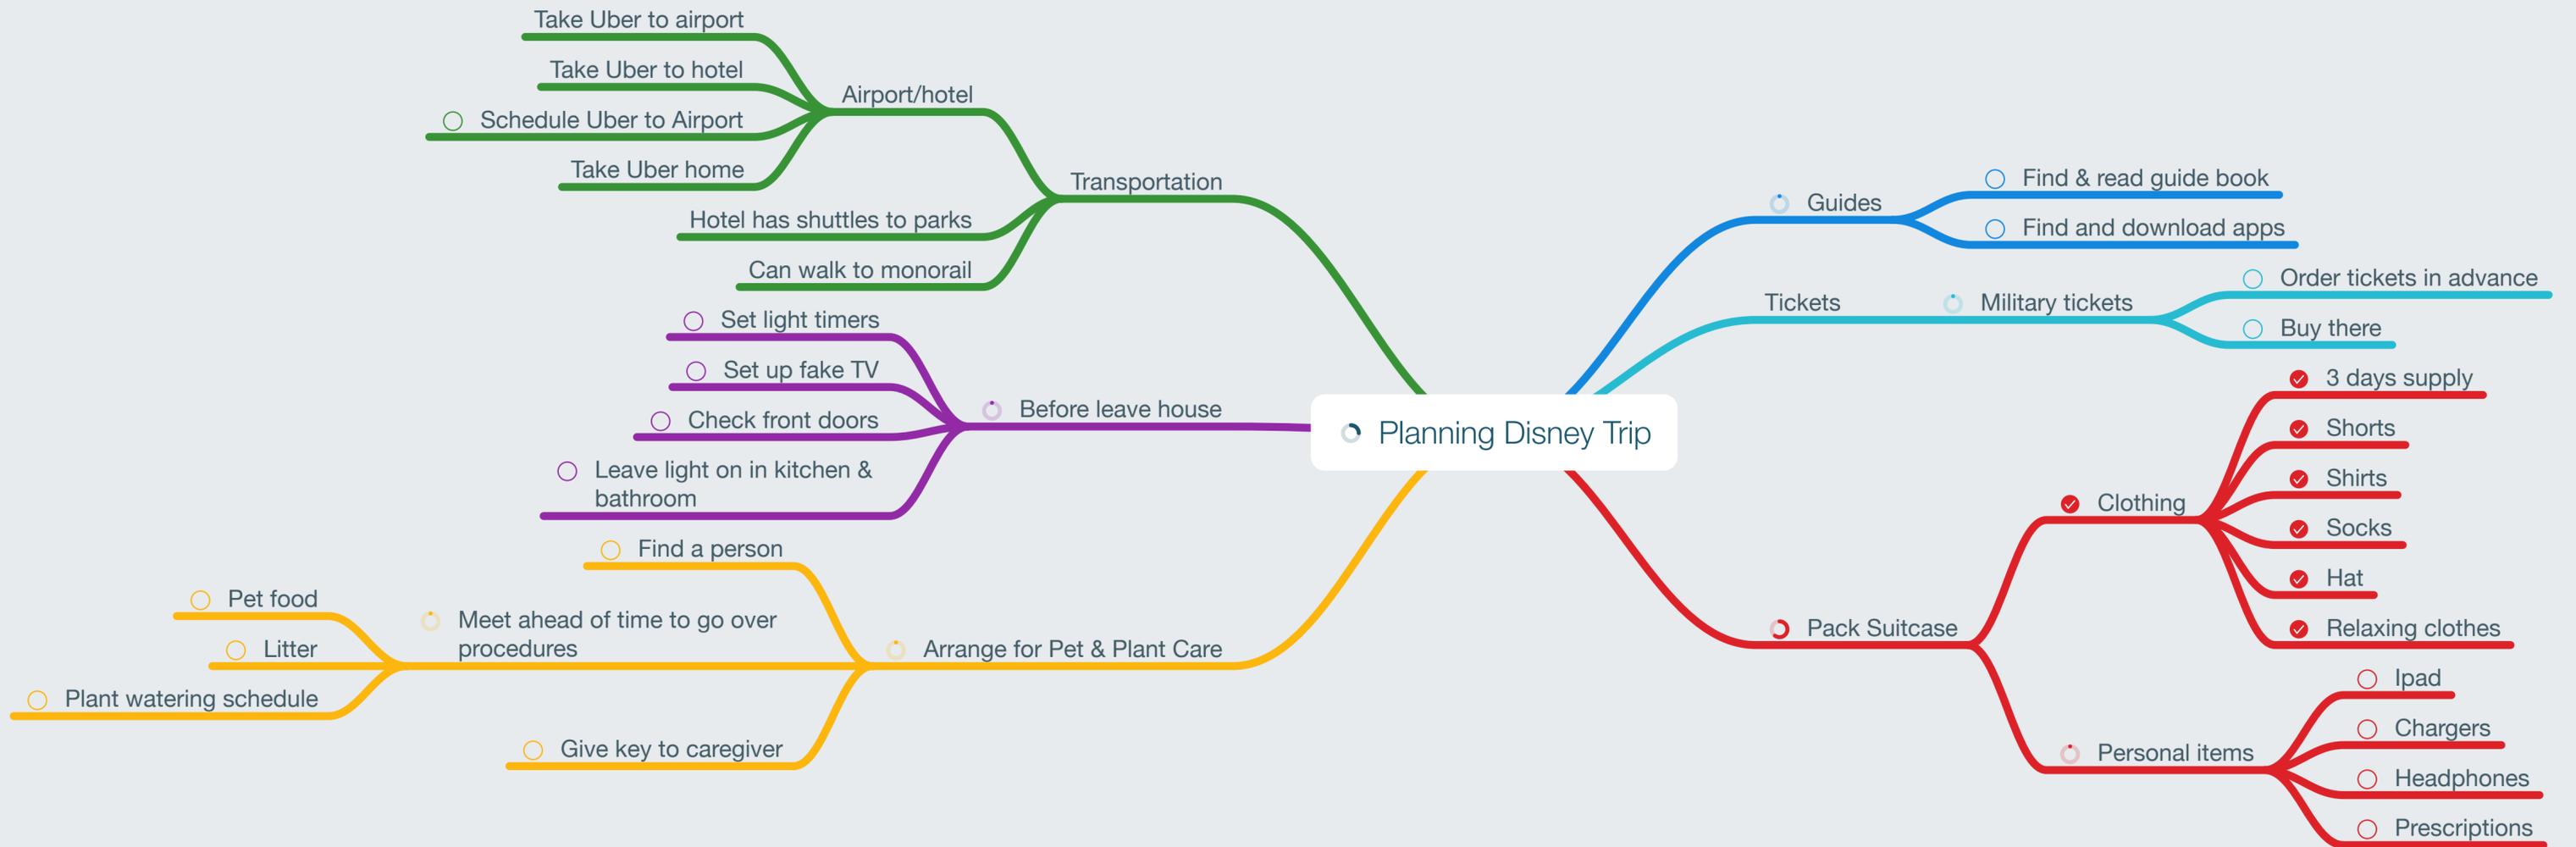

In our culture, in heterosexual couples, men are expected to make the first move. Unfortunately, most men are awful at detecting when a woman is ready for a kiss. Mark Manson wrote in *Models*, "When it comes to kissing a woman, there's an old adage amongst dating coaches: if you think you can kiss her, you probably could have ten minutes ago."
